

Lecture Capture and Publication consent

For videos that will be available on Weblearn via SSO

From time to time the Nuffield Department of Medicine records its seminars. These recordings are used to inform the Department and the University community about our scientific activities.

We would like your permission to do the following:

- Record your presentation/seminar using Panopto/Replay Lecture Capture system.
- Apply only limited editing.
- Make the resulting video available to the University community, via Weblearn; the video will be accessed after signing in via the single sign on (SSO) system, so access will be limited to current University of Oxford members only.

I agree to my seminar/presentation being used in this way.
